Everyone will use these notebooks differently. Personally I record the day's events and then augment them by sticking photographs, boarding pass, currency or some memento on each facing page. Whatever you choose, I hope, that on your return home, it will be given a place in the nostalgic records of your travels.

I find that it is when you are actually travelling that you talk most about travel. Where you have been, where you want to go next, romantic hotels, remote game lodges and exciting adventures. To help stimulate these thoughts, we have appended some journey ideas at the back of this journal which might possibly inspire additional desires. Remember, just like the journey you are on, someone from our office has been there and we will be able to create an itinerary that meets your aspirations.

Have a wonderful trip and do, please, give us constructive feedback when you return. Without your help we cannot improve.
